Avula Manoj

Motivated Computer Science student with hands-on experience in full-stack web development. Passionate about solving real-world problems and constantly learning new tools and technologies. Eager to leverage my academic knowledge and practical project experience to build scalable, efficient solutions and contribute meaningfully to collaborative, growth-oriented teams. Manojavula08@gmail.com | +917675951693 | GitHub |

SKILLS

- **BackEnd:** Python
- **Frameworks:** Django, Flask
- **FrontEnd:** HTML, CSS3, JavaScript, ReactJS, Bootstrap
- **Database:** MySQL, SQLite
- **Version Control:** Git, GitHub
- **Tools & IDEs:** MAVEN, PostMan, Eclipse, IntelliJ, VS Code

PROJECTS

● **Cuppify Cafe** **HTML | CSS | JAVA SCRIPT | Python | MySQL | Django**

Full stack development

Developed Cuppify, a cafe management web application using Python, Django and SQLite, with a customer entry screen (name and phone number), menu and order management through Django models and views, and an admin panel for managing products and orders. Built the interface with HTML and CSS and applied Django's MVT architecture for clean, maintainable code.

● **IOT-Person Counter** **C++ | SQLite | Python | JavaScript**

Full Stack Development

Developed PersonCounter, an IoT people-counting system using an ESP32 and two IR sensors to detect entry and exit direction at a doorway, with C++ (Arduino) firmware that uses a state machine for direction detection and debouncing, sending events over Wi-Fi as JSON to a Python Flask backend with SQLite storage, and a live HTML/CSS/JavaScript dashboard showing the number of people currently inside.

● **Quiz Application** **Python (core concepts)**

Stand Alone Project

Developed a Mini Quiz Application using Python, implementing object-oriented programming (OOP) concepts such as abstraction, inheritance, and polymorphism. Utilized abstract classes and methods, exception handling, lists, loops, conditional statements, and functions to create an interactive question-and-answer system with automatic score calculation and result evaluation.

● **BookHall** **React.js | Python | MySQL | REST Framework | JWT**

Full Stack Development

Developed a BookHall web application using React (Vite) for the frontend and a Django REST API with the Django ORM and MySQL on the backend, implementing JWT authentication, role-based access (admin-only book management, read-only access for readers), book catalog CRUD, search and a page-by-page reader. Applied Django's model-view-serializer architecture to keep the code clean and maintainable, with a responsive UI and RESTful APIs, and deployed it live using Vercel, Render and Aiven.

INTERNSHIPS

- **WebTech Software Solutions** **May - Nov/2026**

Full Stack Development

- o Developed a responsive web applications using HTML, CSS, JavaScript, ReactJS and Bootstrap focusing on user friendly and interactive interfaces.
- o Buit RESTful APIs using Python/Django, integrated MySQL for database management, and used Git/GitHub for version control.

CERTIFICATIONS

Advanced java programming – VED up Skilling
Java FullStack Development – Skill Dzire
Python Full Stack Development – Web Tech Software solutions

EDUCATION

Bachelor of Technology – Computer Science and Engineering **2022 - 2026**

Mother Theresa Institute of Engineering & Technology – Palamaner *Percentage-77%*

STRENGTHS

- Quick Learning
- Good listener
- Smart and hard work

DECLARATION

I hereby declare that the above stated information is true and correct to the best of my knowledge. I will be highly thankful if you give an opportunity to prove my worthiness.
